

Gallus Classics – Pre-owned label printing presses and original spare parts directly from the manufacturer

St. Gallen, January 2022 – Investment-proof and productive production with used Gallus presses, too – this enables Gallus Classics, the division of Gallus serving the preowned machinery market. With refurbished machines as well as a spare parts service for older machine systems and other services, Gallus Classics offers a comprehensive portfolio for second-hand Gallus machines.

Extensive service program for pre-owned machines

The Gallus Classics team helps customers to ensure that they can continue to operate their used Gallus machines successfully. A pool of new and used original spare parts helps as well as a large network of relationships to procure urgently needed parts. The printing experts are also repairing old Gallus printing presses and carrying out upgrades so that they can be serviced again by the Gallus Service and Helpdesk team. An upgrade campaign is currently running for the machines of the Gallus TCS 250 and Gallus EM 260/340/410/510 series.

Gallus pre-owned machines ex works with manufacturer's warranty

Depending on the model and conditions, a six- or twelve-month manufacturer's warranty can be given on a revised press. Every retrofit carried out by the Gallus Classics team has successfully passed a 360° machine check before delivery and meets all predefined product standards. This ensures that the pre-used Gallus machine system meets the technical requirements and maximum safety.

The Gallus Classics portfolio includes not only upgrades, retrofits and individual repairs of older machine systems, but also a range of other services such as revisions and repairs of printing units, the rental of offset printing units or the replacement of offset rollers and their refurbishment.

"We know that there is still enormous potential in a pre-owned Gallus machine," explains Giuseppe Gallelli, Head of the business unit Gallus Classics. "That's why my team and I are doing everything we can to ensure that our customers are as satisfied with their newly acquired second-hand machine as if they had bought a new Gallus machine."

About Gallus

Gallus with production facilities in Switzerland and Germany, is a leading company in the development, production of conventional and digital narrow-web, reel-fed presses designed for the label and packaging business. The machine portfolio is augmented by a broad range of screen printing plates (Gallus Screeny), globally decentralised service operations, and a broad offering of printing accessories and replacement parts. Products and services of the Gallus brand are distributed through the global Sales and Service network of Heidelberger Druckmaschinen AG. The comprehensive portfolio also includes consulting services provided by label experts in all relevant printing and process engineering tasks. Gallus employs around 290 people, of whom 168 are based in Switzerland, where the company has its headquarters in St. Gallen. For more information, visit www.gallus-group.com
